Is it a Bear??
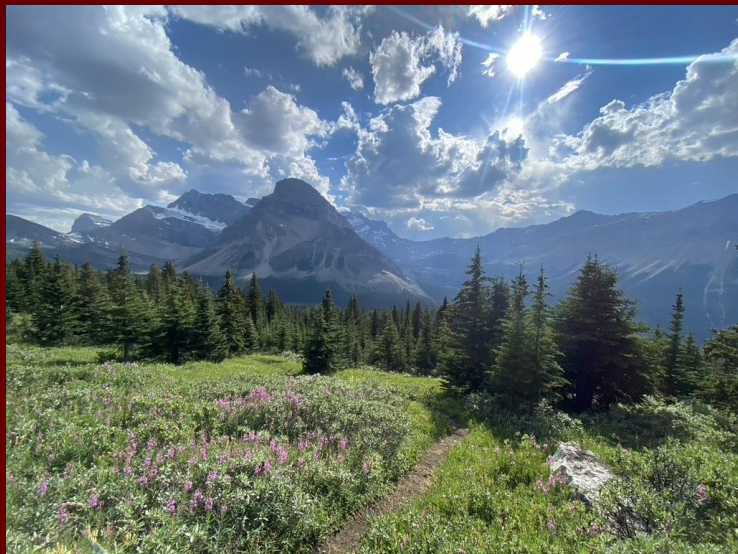

● ● ●

Identifying bear droppings through Convoluted Neural Networks

A General Assembly - DSI 1128 Project

MY PROBLEM:

- **Can I develop an application using CNN to identify a picture of bear poo?**
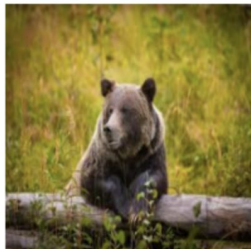

MY PROBLEM:

OVERVIEW
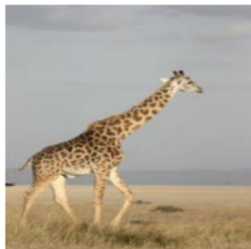

- Data
- EDA
- CNN Model
- Transfer Model
- Going Forward

Data Collection & Labelling
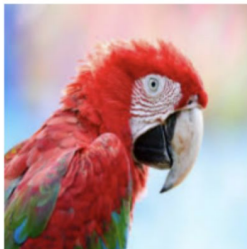

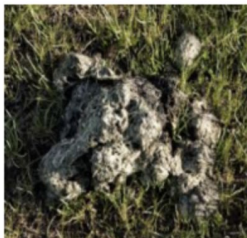

Data Augmentation

Modelling

Loss and Accuracy for Train Vs Validation data

Further Study

- Launch a StreamLit app

- Get a better data set to train my model on

- Expand to identifying different kinds of animals by their poo

Thank you!
